

Design project of the development center «Environment of Opportunities» in the OKO tower

Category	Interior Designs	Authors Alexander Poroshkin Kristina Pavlova Veronica Dubovik Ksenia Karpova Taisiya Karpova Anastasia Osipova Damir Ibragimov Anastasia Ruban
Location	Moscow	
Square	950 m²	
Year	2020	

The space is designed in such a way that, depending on requests and situations, it is multifunctional and «flexible».

The office space is divided into public and office areas and includes:

- waiting area for 39 seats;
- phyto-bar area for 7 seats with access to the mezzanine floor;
- conference hall for 45 people, with the possibility of increasing up to 150 seats due to the coworking area;
- 2 classrooms;
- 2 computer classes, with the possibility of organizing additional seats and transforming into a single space;
- offices for managers of the recruitment center;
- 8 meeting rooms from 3 to 7 seats;
- a rest/meal area that can accommodate up to 6 people;
- library;
- an office of 24 workplaces.

Additionally, transformable spaces were provided for educational tasks, negotiations, business meetings and conferences.

Noise-absorbing panels, screens, meeting rooms, a study area, places for individual and collective work allow employees to build their own trajectory of the workflow. A balance is created between work and rest, which in the future allows employees not to «burn out» at work, communicate more and get feedback faster on important issues within groups.
