Happy Village

Category	Urban Planning	Authors
Location	Kazakhstan	Alexander Poroshkin
Square	153.330 m ²	Ilya Korenev
Year	2014	Ekaterina Zrazhevskaya
Status	Concept	Alexey Tabakov

Happy Village is located in Kazakhstan, 7 kilometers from Astana, which provides it with high transport accessibility. The plot is located in a steppe zone and is densely surrounded by forest. Architects made a schematic design of the village, within which the site was functionally divided into 7 areas:

entrance zone

«amusement town» (sports, leisure zones, restaurant, children's center, bath complex, spa, theme park)

large park recreation zone (park area, pond, which becomes a skating rink in winter)

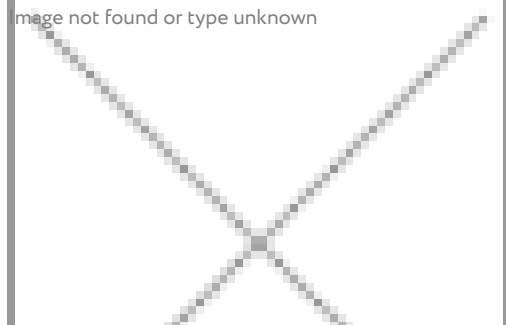

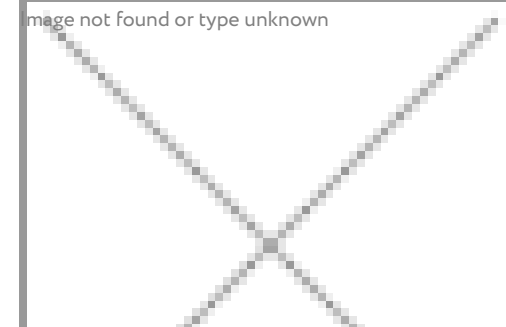

business and luxury class houses

premium houses

golf club

premises for employees

To reveal the environmental potential of the territory, it was proposed to use energy-saving technologies (geothermal heat pumps, solar panels, wind generators, rainwater harvesting). The arrangement and facades of the houses also support the environmental commitment of the village: wood, travertine, brick, stone are used in the finishing design of the houses. For the recreational area, walking routes, territory improvement and landscaping elements have been designed.
