

Interior design for the new terminal of Sheremetyevo Airport

Category	Competitions Interior Designs	Authors Alexander Poroshkin Ilya Korenev Elena Vinogradova Kristina Pavlova Natalya Ryabova Anisimova A. Asadov A.R Asadov A.A
Year	2016	
Status	Concept	

Joint competitive design project with Asadov Architect bureau. For a short period of time five options were designed for five areas: entry area, registration area, departure area, luggage and exit areas.

Interior designs were proposed based on unique Russian natural and climatic features. Passengers and visitors to the airport have pleasant associations when they see interior elements that remind them of a beautiful snowy winter, rye fields, clear blue sky and the great outdoors of our country.
