

Design project of an apartment at Shchukinskaya metro station

Category	Interior Designs
Location	Moscow
Square	75 m²
Year	2012

The interior has been designed in the best traditions of minimalism — light colors of furniture, walls, natural materials, high functionality of decoration items and zoning of space, based on the habits and needs of residents.

Great emphasis has been placed on the hardwood floor, which becomes a signature of the apartment and «unites» all objects and interior elements into a whole. The «wooden» theme is also actively used in the bathroom area.
