

Lobby interior design for Capital Group residential complex

Category	Interior Designs	Authors Alexander Poroshkin Ilya Korenev
Location	Moscow	
Square	60 m ²	
Year	2018	
Status	Concept	

The interior conceptual design of the entrance lobby of the premium-class residential complex «Medniy 3.14» of Capital Group, which is located in the Yakimanka District. The bureau proposed three options for the interior design, where the themes of metal, natural minerals (in this case, copper) and the refraction of their edges under lighting have been used.

This way we achieved beautiful effects of light (natural and electric) and semi-glossy texture of the column and wall panels. The architects decided to maximize the use of copper shades in the interior, without «overloading» the space, but making it stylish, fancy and functional.
