For golf club Links National Resort have developed a concept of a hotel complex with developed infrastructure. The plot is located in the village of Teleshovo, Dmitrovsky urban district, Moscow region. For the bureau, the work on this project was also attractive because the client focused on modern architecture, and here the interests crossed. The number of visitors to the golf club was growing, so there was a demand for facilities where you can relax after playing golf.

Having analyzed the environment, the existing terrain, transport accessibility, customer and audience needs, we developed the hotel complex, Beach club with a cozy restaurant, spacious spa and swimming pool. The restaurant can accommodate up to 250 guests. The project includes a conference hall in addition to the main hall, technical rooms and kitchen.

There was already a sauna complex on the territory, so the bureau offered the concept of a spa complex with a deep pool and saunas. The restaurant and spa are located in a long lobby, with through passageways, which will allow visitors of National Links Resort to notice a beautiful pond in front of the car park. The design of the lobby is made of glued beam, which, in addition to direct functionality, will also be an effective interior solution along with extensive glazing. This gives the structure «lightness», compactness and durability.

Hotel apartments of different sizes have been designed for those who decided to stay for a long weekend.
